- For the given JSON iterate over all for loops (for, for in, for of, forEach);

1) for;

loops through a block of code a number of times.

2) for in;

loops through the properties of an object.

3)for of;

loops through the values of an iterable object.

4)foreach;

calls a function for each element in an array.

- Read about the difference between window, screen and document in javascript;

Window

The window object is supported by all browsers. It represents the browser's window.

All global JavaScript objects, functions, and variables automatically become members of the window object.

Screen

The screen object contains information about the visitor's screen.

Document

The document object represents your web page.

If you want to access any element in an HTML page, you always start with accessing the document object.
